Collagen is a type of protein created by fibroblasts and other cells. The main task of collagen in skin cells is to strengthen the connective tissue and protect the body integrity. By joining the connective tissue structure that protects skin cells, it gives the skin strength, flexibility and vitality.

The amount of collagen protein that forms connective tissues begins to decrease as the human body ages and becomes insufficient after a while. Collagen loss, which increases with aging, causes problems such as dry skin, wrinkles, cellulite and decrease in elasticity.

COLLAGEN SUPPLEMENTATION TO THE SKIN

You can protect your skin against the effects of aging with collagen-containing strip and mask.

COLLAGEN

Collagen, which is frequently produced by the body at young ages, decreases not only with the advancement of age, but also due to reasons such as unhealthy diet, stress, smoking, excessive sun exposure and vitamin C deficiency. As collagen decreases, the skin may begin to lose its elasticity. Collagen renews the dead skin cells, increases the elasticity of our skin and keeps it firm.*

After the age of 25, collagen production in the body drops, and by the age of 35, a certain proportion of collagen decreases. Therefore, in order to support the collagen production of the body and prevent collagen loss, it is necessary to take internal and external collagen supplements as the age progresses.*

Coenzyme Q10 can delay aging, protect the skin, and help keep your skin youthful.

CoQ10

Coenzyme Q10 is a very important resource for cells to generate energy and regenerate cells. It also has an antioxidant effect in the body.

Especially aging in the cells causes the coenzyme Q10 levels to decrease.

Applying CoQ10 directly to the skin can increase energy production and antioxidant protection in skin cells, reducing damage from internal and external factors.

G I N S E N G

Ginseng, which has been observed to have a serious anti-aging effect in recent years, supports the production of collagen by minimizing the damage caused by free radicals to the skin and provides tightening by preventing sagging of the skin. It is ideal for generating skin cells and regeneration. With its powerful tonic function, it cleans the naevus and black spots on the skin, heals the wrinkles on the face and thus helps to eliminate skin problems.

V I T A M I N E

Vitamin E is one of the essential vitamins with antioxidant properties that meet the needs of our body. It occurs naturally in many foods. However, due to the lack of natural and healthy nutrition, which is the biggest problem today, we cannot get enough of this vitamin. Vitamin E is used in the cosmetics industry to help protect against skin aging, inflammation and sun damage. In addition, as stated by many scientific sources, it is very effective in cell renewal and skin tissue health. It has many positive effects from blemishes on the skin to moisturizing dry skin.

A C A C I A H O N E Y

Acacia honey is produced in rural highlands of Croatia, where there is little population and no pollution. Traditionally, bees are bred in a natural, artistic way with full respect to the environment. No sugar or any other additional substance has been added to the honey during the process. It is a pure and natural product prepared with utmost respect. It has an antibiotic value that will eliminate microorganisms originating from propolis.

Not only your genetic heritage determines the speed of skin aging in both men and women. Not only your genes decide how your skin will age. External factors (the effects of environmental aging) are much more important.

Our body is a wonderful mechanism. Anti-oxidant components that keep our skin firm and vigorous and prevent diseases are naturally produced in our body.

However, the problem is that this production decreases in later years due to some diseases and malnutrition.

Some of the Negative Factors Affecting Our Skin

- Excessive exposure to sunlight
- Unhealthy and irregular diet
- Sleep disorders
- Stress
- Smoking
- Consumption of sugar and refined products
- Excessive alcohol consumption
- High blood sugar
- Environmental pollution

When Using the Product:

- Apply directly to the body.
- Avoid contact with eyes and the other sensitive areas of the body.
- Do not apply to burned and injured body parts.
- Use carefully in case of pregnancy.
- For external use only.
- Should be applied on pre-cleaned, dry and hairless skin.

Keep out of the reach of children.

Keep away from direct sunlight.

Keep in a cool and dry place.

INGREDIENTS:

- Collagen
- Coenzyme Q10
- Acacia honey
- Vitamin E
- Ginseng
